Jeep

ISUZU

Amplify Your Ride.

Features

OneConnect (Wireless for Android and iPhone)

This cutting-edge technology overlays your mobile device onto the OneNav radio display. Whether navigating, listening to music, playing a podcast, making a phone call or receiving messages, OneConnect not only displays all the information onto your radio but also allows you to operate your device from the radio touch screen. With one touch access to Siri or Google Assist, not only will your journey be safer, but it also turns your radio into a personal assistant, obeying your voice commands.

Android

Android is the most efficient platform for the automotive applications required on your OneNav radio. Being the most popular operating system in the world, Android updates are offered regularly which can easily be downloaded by connecting your radio to a Wi-Fi network. APPs from the Google Play Store can also be downloaded directly onto your radio.

Advanced Bluetooth

Connecting your mobile device via Bluetooth allows you to make calls from your phonebook and receive calls showing caller ID, this all from the radios touch screen without needing to lay a finger on your phone. The A2DP function allows you to play Bluetooth streaming audio from your phone through the radio while displaying song and artist information. It even allows for pause / play, skip forward and backward operation from the radio touch screen.

Wi-Fi

Built in Wi-Fi connects your radio to the endless possibilities of the internet. Download updates, download APPs, customise the radios functionality, etc.

Steering Control Integration

State-of-the-art can bus integration means you keep full functionality and the convenience of all your original steering wheel controls.

Software Updates

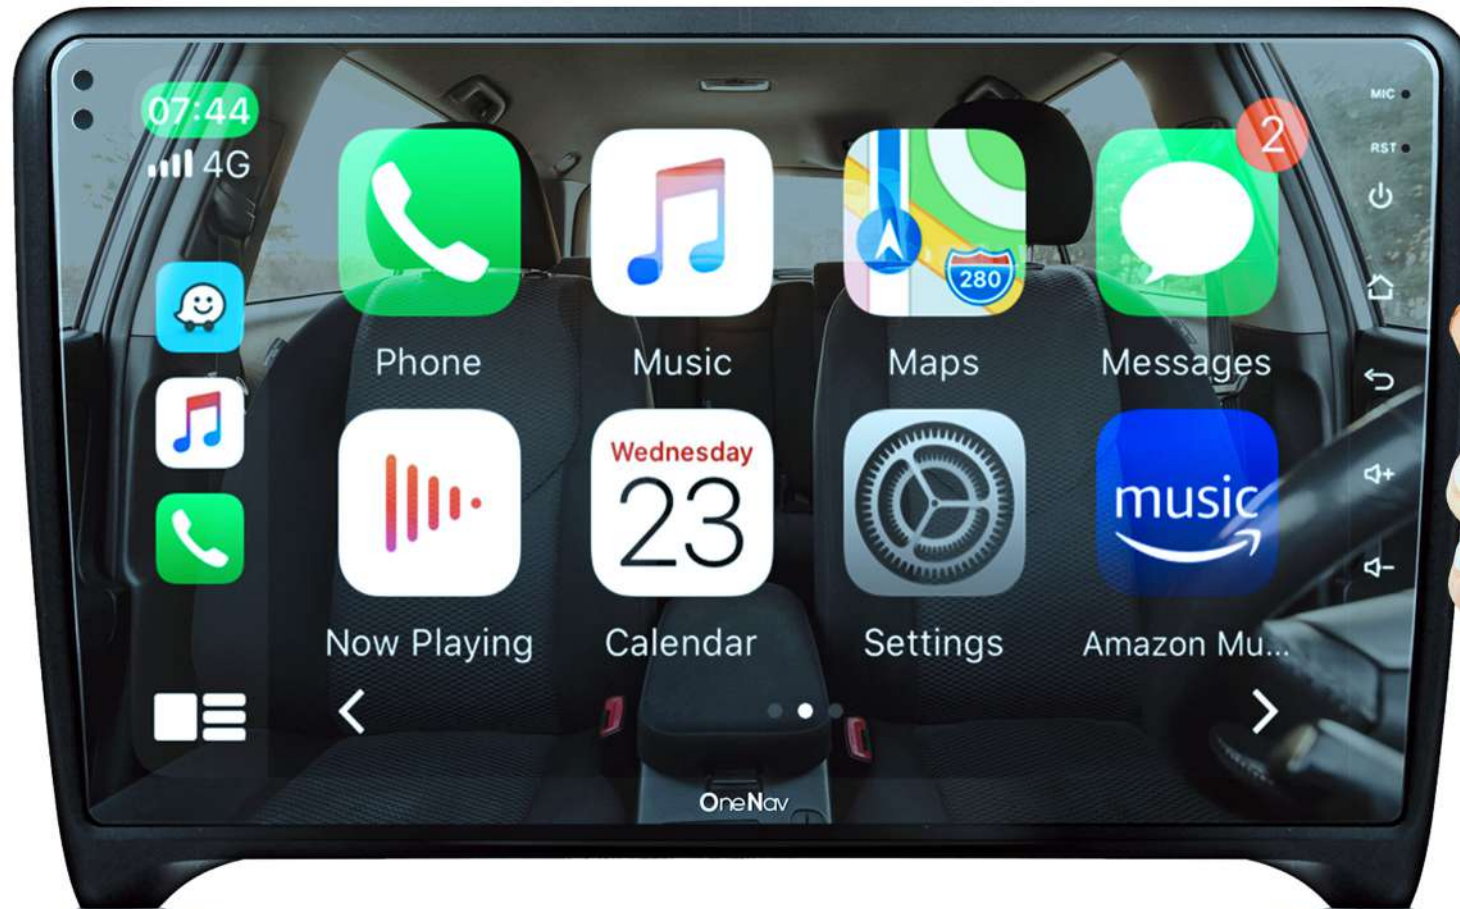

By simply connecting to Wi-Fi, our patented software APP allows for you to add and remove functions, update your software and download any bug fixes.

3 Year Warranty on all OneNav Models

**for all
available models**

The Adaptive Screen

The adaptive series comes in 2 parts - the screen and the fitment kit.

This allows for the flexibility of re-installing your same radio when purchasing a new vehicle.

All you have to do is purchase a different fitment kit and you're good to go. Is your vehicle fitment kit not in this catalogue?

Let us know and we'll source it for you.

OneX

Accessories specifically designed and developed to integrate seamlessly with your Ride.

- OneX Cameras
- OneX DVD Players
- OneX Android Tablets
- OneX Smart Mirrors and more..
